

[Turkey's National Geographic Information System \(TUCBS\) Project](#) [1]

Action numbered 75 "Geographic Information Infrastructure Installation" project in the Action Plan under title Modernization of Public Administration in Information Society Strategy which entered into force upon publication in the Official Gazette dated 28/07/2006 numbered 26242 envisaging the provision of data from the place where it is generated was carried out under the responsibility of the General Directorate of Land Registry and Cadastre.

TUCBS is an e-state project aiming at establishing the infrastructure for Geographical Information System (Turkish National Geographic Information System-TUCBS) in accordance with technological developments at the national level and INSPIRE Directive creating a web portal for public institutions and organizations to provide on a common infrastructure the geographic information they are responsible for, creating content standards so that geographic data can meet the needs of all user institutions and identification of data interchange standards.

Carried out under the responsibility of the General Directorate of Land Registry and Cadastre, Geographic Information System Infrastructure (CBSA) Installation Feasibility Study Report was prepared and submitted to the repealed State Planning Organization on January 27, 2011.

As te task of establishing and developing the National Geographical Information System was given to the General Directorate of Geographic Information Systems established in accordance with Decree Law No. 644, future work on this issue will be carried out by the General Directorate of Geographic Information Systems.
